

Play value

The Spiral Bells are intended to strengthen the entire shoulder girdle and the arms. The task is for people to stretch while looking upwards to the spiral situated above head height. Bells are installed at regular intervals in the curved tube. The aim is to touch each one in a circular pattern and make them ring. In performing this exercise people grasp for objects and train the mobility of their joints.

Recommended for

- School children
- Young people
- Adults
- Older people
- Public play areas without supervision, such as playgrounds, parks or similar
