

### Play value

The Triangular Platform on Stilts is an attractive combination element for playground equipment. Its unusual shape makes the platform a very special eye-catcher. And thanks to a wide range of attachment options, such as slides, climbing nets, sliding poles or ropes, it offers a host of opportunities for play. The triangular net in the lower area invites children to sit or lie down, and the covered playing level promotes role-playing and hide-and-seek games. Moreover, they can enjoy the wonderful view from up there.

### Fundamental characteristics

- Child-oriented dimensions according to ergonomic knowledge
- Numerous combination options
- Harmonious design language
- Incentive for playing: possibility to lie down, climbing up high, enjoying the view, role-playing games
- Movement: climbing, sitting, balancing

### Recommended for

- School children
- Supervised play areas, such as schools, after-school programmes or similar
- Public play areas without supervision, such as playgrounds, parks or similar
- Leisure areas

Special version with slide and add-on elements

### Planning information

The overall plan must include an access, e.g. via a ladder, rope or bridge (not included in delivery).

### Triangular Platform on Stilts

3.23500

**Order No. 3.23500**  
**Triangular Platform on Stilts**

Scale 1:100

Safety check according to DIN EN 1176

**Components**

- 1 Platform complete with steel feet, floor and 3 parapets
- 1 Roof 3-ply
- 1 Triangular net

**Installation information**

Surfacing requirements corresponding to a fall height of  $\leq 2.00$  m (please refer to price list for more detailed information)

Foundations  
3 items 100 x 100 x 60 cm  
Excavation depth 80 cm

**Attention!**  
Exact measurements may vary;  
for all installation dimensions refer to current assembly instructions.  
Technical changes reserved.

**Technical information**

Equipment made of non-impregnated mountain larch

**Peeled white**

Palisades peeled white means that bark, cambium and sapwood are removed, the natural shape of the trunk is preserved and can be experienced

**Core-free**

Sawn-timbers core-free, thus decreasing occurrences of cracking and undesired changes in shape

**Claddings**

Claddings made of mountain larch (4 – 5 cm). Peeled white by hand, natural tree surface remains tangible and perceptible

**Tongue and groove**

Tongue and groove planks made of 4 cm solid wood, highly resilient, no trickling of dust / sand, protection against direct rain

**Hercules rope**

Hercules rope, for spliced net connections. A compound of steel rope for the core and polyester or polyamide yarn for the sheath. High abrasion resistance, 4 or 6 strands

**Aluminium rope pressing**

Aluminium rope pressing, cylindrically pressed, with rounded ends

**Rope connection with joint**

Close-fitting connection with joint, without dangerous openings, with sintered bush and adjustable screw connection

**Profiled washer**

Profiled washer for covering protruding screw heads according to standard, improved pressure distribution and protection against water. Impedes loosening the bolt

**Adjustable**

Adjustable two-piece bolt connection, easy to maintain, no projecting threads

**Ground anchor**

All parts used for anchoring to the ground are made of hot-dip galvanised steel or stainless steel

**For more detailed explanation of the quality characteristics see price list.**
