Play value

A large number of add-on elements gives the planner the possibility to design playgrounds in a versatile and interesting way. The slide platform is an example of this.

Fundamental characteristics

- Unique position
- Agreeable design
- Incentive for playing: experience height, role-playing games
- Movement: climbing, sliding

Recommended for

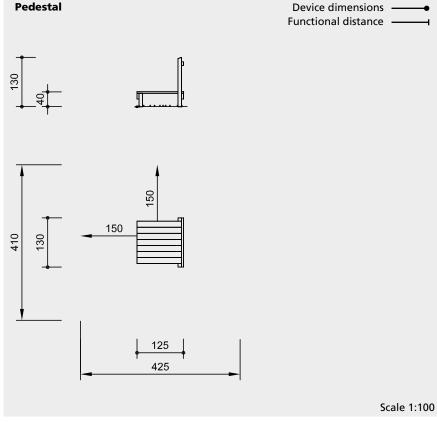

- Kindergarten children
- School children
- Supervised play areas, such as kindergartens, schools, after-school programmes or similar
- Public play areas without supervision, such as playgrounds, parks or similar

This picture shows an old version without steel feet

Safety distance -

Safety check according to DIN EN 1176

Order No. 3.64311

Components

- Platform
- 4 Stand posts with steel feet
- 1 Handrail

Technical information

Equipment made of non-impregnated mountain larch

Bevel cut

Vertical stand posts with bevelled end grain section as constructive wood preservation measure

Core-free

Sawn-timbers core-free, thus decreasing occurrences of cracking and undesired changes in shape

Tongue and groove

Tongue and groove planks made of 4 cm solid wood, highly resilient, no trickling of dust / sand, protection against direct rain

Ground anchor

All parts used for anchoring to the ground are made of hot-dip galvanised steel or stainless steel

For more detailed explanation of the quality characteristics see price list.

Dimensions

(small deviations possible)

1.30 m
1.30 m
1.25 m
90 kg

Installation information

Surfacing requirements

This equipment does not reach the free height of fall limit of 0.60 m above which a specific requirement for impact absorbing surfacing or materials is necessary. However, we recommend surfacing corresponding to a fall height of \leq 1.00 m.

Foundations 4 items 50 x 50 x 50 cm Excavation depth 70 cm

Attention:

Exact measurements may vary; for all installation dimensions refer to current assembly instructions.

Technical changes reserved.
