

### Play value

The climbing pyramid, constructed from debarked round logs, attracts attention and interest even from a long distance away. Its popularity arises from the different levels, which encourage a whole range of different exercise and role-playing games. The individual bars can be climbed and explored, serving not only for experiencing height and for tactile experiences on hands and feet, but also as attractive seating for resting, observing and chatting. It's even more relaxed in the integrated hammock, which offers enough space for several children at the same time.
