

Play value

Slip through the bars, peer in and out, get from one end of the course to the other using the ropes without touching the ground, swing off the balance ropes, or climb hand over hand along the upper ropes – there are no limits to the physical activities here. Even the youngest children can venture a little higher with the help of the colourful climbing holds.

Special version

Fundamental characteristics

- Natural, strong posts
- Creates a distinctive atmosphere
- Strong visual impact
- A real eye-catcher at any play area
- No pre-determined play procedures, individual mastering
- Incentive for playing: role-play, curiosity, experiencing height
- Movement: climbing, balancing, doing exercise

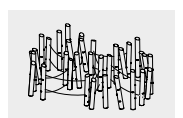

Recommended for

- Kindergarten children
- School children
- Supervised play areas, such as kindergartens, schools, after-school programmes or similar
- Public play areas without supervision, such as playgrounds, parks or similar

Note

Please request the latest installation instructions for on-site measurements. Technical changes reserved.

Technical information

Posts made of robinia, Ø 15 - 21 cm

Peeled white

Palisades peeled white means that bark, cambium and sapwood are removed, the natural shape of the trunk is preserved and can be experienced

Bevel cut

Vertical stand posts with bevelled end grain section as constructive wood preservation measure

Richter Hercules type rope

Richter Hercules type rope, a combination of galvanised six-strand steel cables and polyester yarn, diameter > 20 mm, laid and glued with very good abrasion resistance, strong sheathing even in the case of damage by puncturing

Aluminium rope pressing

Aluminium rope pressing, cylindrically pressed, with rounded ends

Stainless Chains

Chains made of steel 1.4571 with high corrosion resistance. Short-linked, without eyelets on the connecting parts, easily replaceable and simple shortening

Fastening of rope

Fastening of rope / net by means of adjustable chain fixation, easy assembly and maintenance

Standard colour rope: red

Professional climbing grips made of a mixture of sand-synthetic resin with safe anti-rotation system against unintended twisting of the grips

For more detailed explanation of the quality characteristics see price list.
