

Play value

Our Hill and Glen structure offers many opportunities for play and physical activity. The first "hill" can be easily conquered using climbing aids, while the opposite side presents a greater challenge with its wide-mesh net. The mix of sloped surfaces and nets is fun and promotes balance and coordination. But it's not just about exercise: it also invites children to relax and unwind. The nets can double as hammocks for resting and observing. Beneath the structure, a shaded area provides a perfect retreat on sunny days – ideal for hiding, taking a break, or imaginative role-playing.

Fundamental characteristics

- Strong visual impact
- Creates a distinctive atmosphere
- A real eye-catcher at any play area
- Attractive meeting point
- Incentive for playing: curiosity, role-play
- Movement: climbing, scaling

Recommended for

- Kindergarten children
- Schoolchildren
- Supervised play areas, such as kindergartens, schools, after school programmes or similar
- Public play areas without supervision, such as playgrounds, parks or similar

Functional distance —

Scale 1:100

Safety check according to DIN EN 1176

Components

- 2 Wooden floors
- 2 Steel frame with net
- 1 Beam
- 1 Bundle steel feet
- 1 Pack fasteners

Installation information

Surfacing requirements
corresponding to a fall height of ≤ 1.50 m
(please refer to price list for more
detailed information)

Foundations
10 items 60 x 60 x 60 cm
Excavation depth 80 cm

Attention:
Exact measurements may vary, for
all installation dimensions refer to
current installation instructions.
Technical changes reserved.

Technical information

Equipment made of natural mountain
larch

Core-free

Sawn-timbers core-free, thus decreasing
occurrences of cracking and undesired
changes in shape

Claddings

Claddings made of mountain larch
(4 – 5 cm). Peeled white by hand,
natural tree surface remains tangible
and perceptible

Tongue and groove

Tongue and groove planks made of
4 cm solid wood, highly resilient, no
trickling of dust / sand, protection
against direct rain

Hercules rope

Hercules rope, for spliced net connec-
tions. A compound of steel rope for the
core and polyester or polyamide yarn
for the sheath. High abrasion resistance,
4 or 6 strands

Aluminium rope pressing

Aluminium rope pressing, cylindrically
pressed, with rounded ends

Profiled washer

Profiled washer for covering protruding
screw heads according to standard,
improved pressure distribution and
protection against water. Impedes
loosening the bolt

Adjustable

Adjustable two-piece bolt connection,
easy to maintain,
no projecting threads

Ground anchor

All parts used for anchoring to the
ground are made of hot-dip galvanised
steel or stainless steel

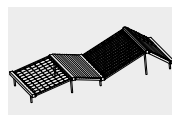

**For more detailed explanation of the
quality characteristics see price list.**

Fittings hot-dip galvanised
