

The equipment must be checked for correct operation and safety, especially the points listed below:

Proof of maintenance

Wooden parts

1. Check for rot and, if necessary, smooth out splinters and round off sharp edges of cracks.
2. Check that all bolts and screws are tight and retighten if necessary.
3. **Recommendation:** apply paraffin wax to the upper end grain areas once a year, please refer to Order No. 0.90100. 1 litre.

Steel bell

4. Check that the bell is present and securely connected, retighten screws/bolts if necessary.

- ## Structural stability

- In order to check for rot at wooden parts and steel feet for corrosion, uncover the foundations once a year.
