

The equipment must be checked for correct operation and safety, especially the points listed below:

Proof of maintenance

Function

1. Check lock gate for free movement and leakage; if sand or similar has got into the guide housing, rinse through with lots of water – a small amount will also flow through even if the gate is shutting well.
2. Check the rubber sealing plate for wear and tear.
3. Check that connection is stable.

Structural stability

4. Check anchoring to concrete or masonry once a year.

- location
- usage
- frequency of use
- possible vandalism

Lock Gate
Order No. 5.20930 / 5.20933 /
