

Order No. 6.31000 Hexagonal Rocking Plate

Play value

The flat metal plates with the fixed approach ramps and a moving part, for turning and rocking, require no foundations. They are light enough to move with a trailer but heavy enough so that they cannot be moved by vandals. Their stability also allows wheelchair users and people with cycles and mopeds to drive on and over them. The ground plates of metal are a discreet but effective play item for pedestrian areas, schoolyards and playgrounds and stimulate active play.

Fundamental characteristics

- Unique and original
- Offer for active play with integrative character
- Also suitable for wheelchair users
- Incentive for playing: surprising element on the ground
- Movement: rocking (side to side)

Recommended for

- Kindergarten children
- School children
- Young people
- Supervised play areas, such as kindergartens, schools, after-school programmes or similar
- Public play areas without supervision, such as playgrounds, parks or similar

Barrier-free

- Special exercise experience
- With a carer

Note

An adequate surface design helps to avoid passers-by stepping on the plates unintentionally and thus improves safety.
