

Play value

Children like to exercise on all manner of things and particularly enjoy a mobile ground surface on which skill they can be tested. In order to get the rocking plank moving, it is necessary to jump up and down vigorously - the harder the better here.

Fundamental characteristics

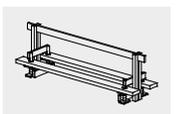

- Incentive for playing: handrail, springs, see-sawing surface
- Movement: jumping, rocking, wobbling

Recommended for

- School children
- Young people
- Supervised play areas, such as kindergartens, schools, after-school programmes or similar
- Public play areas without supervision, such as playgrounds, parks or similar

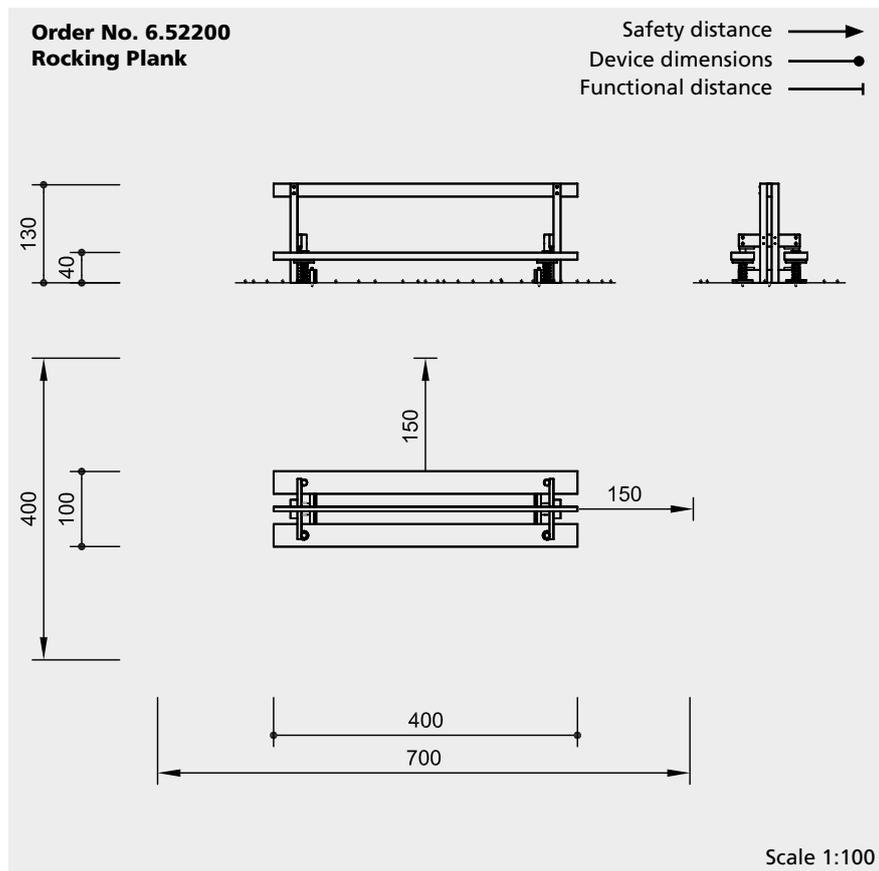

Rocking Plank

6.52200

Safety check according to DIN EN 1176

Components

- 2 Support frames with 2 springs each
- 2 Planks
- 1 Handrail
- 4 Foundation irons

Installation information

Surfacing requirements corresponding to a fall height of ≤ 0.60 m (please refer to price list for more detailed information)

Foundations
2 items 50 x 120 x 27 cm
Excavation depth 50 cm

Attention:
Exact measurements may vary;
for all installation dimensions refer
to current assembly instructions.
Technical changes reserved.

Technical information

Equipment made of non-impregnated mountain larch

Core-free

Sawn-timbers core-free, thus decreasing occurrences of cracking and undesired changes in shape

Ground anchor

All parts used for anchoring to the ground are made of hot-dip galvanised steel or stainless steel

For more detailed explanation of the quality characteristics see price list.

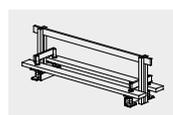

Round timbers of ash, \varnothing 80 mm

Springs powder coated,
Standard colour red

Dimensions

(small deviations possible)

Height	1.30 m
Length	4.00 m
Width	1.00 m
Height of boards	0.40 m
Weight	300 kg
