Play value

The Sound Cushions provide an attractive activity for nearly all ages. Tones are produced by hopping on, or running over the cushions. Surprising tone sequences are produced, interrupted by amusing squeaks. This is a game for children and adults. As installation takes place using ground anchors rather than foundations, the tones can be changed any time. New sequences of movement are then required together with new tones and noises.

Scale 1:50

Safety check according to DIN EN 1176

Technical information

Hopping surface made of textile-reinforced rubber belt, thickness 8 mm

Ground anchor
All parts used for anchoring to the ground are made of hot-dip galvanised steel or stainless steel

For more detailed explanation of the quality characteristics see price list.

Air spring with pipe, for installation in groups pentatonically tuned

Dimensions
(small deviations possible)

|	
Height	0.15 m
Length	0.55 m
Width	0.55 m
Weight	25 kg

Components

1 Hopper
2 Foundation irons

Installation information

Surfacing requirements
corresponding to a fall height of ≤ 0.60 m
(please refer to price list for more
detailed information)

Foundations
Excavation per item
approx. 60 x 20 x 40 cm
(only necessary to immobilise the
equipment)

Attention:
Exact measurements may vary;
for all installation dimensions refer
to current assembly instructions.
Technical changes reserved.
