

Play value

Stretching, elongating, distorting body contours: The Distorting Mirror allows observers to experience their own body in completely different shapes and figures. Convex, concave or convex at the top and concave at the bottom and vice versa – the Distorting Mirror provides both young and old with a variety of possibilities to explore themselves with an unusual appearance. Sensory perception and fantasy are promoted in an entertaining way and the transformation of your own self and that of other people can be experienced with a sense of enjoyment – laughter included. Whether installed in pedestrian zones, in front of or in public buildings, schools, companies or in leisure areas - a group of Distorting Mirrors always acts as an eye-catcher and magnet that really holds your attention.
