Play value

The claddings of the tower walls are de-barked by hand allowing them to retain the natural structure of the wood. This means you can still feel where the branches used to grow on the tree, and the grain remains visible. The playrooms of our towers are also little individual play-house offers and their size matches that of a child's perception. By providing intermediate floors, cosy little rooms are created; some are fitted with a hatch. A bench in the bottom room is an inviting place to meet for a chat where children feel sheltered and protected. Climbing up to the next floor in the tower is also very exciting. The various combination elements such as slide, suspension bridge, chain path etc. make the tower especially appealing. To enhance the transparency, the side walls of the tower can be fitted with four lookout slits at an additional charge.

Order No. L3.20600 Square Tower with Roof

Photo © Daniel Perales

Order No. L3.20600 Square Tower, Attachment elements not included in the scope of components **Towers for combination**

Fundamental characteristics

- High-quality design
- Very special appeal
- Versatile opportunities for combination rooms for play inside
- Incentive for playing: experiencing height, cosy rooms, role-playing games
- Movement: climbing

Recommended for

- Kindergarten children
- School children
- Supervised play areas, such as kindergartens, schools, after-school programmes or similar
- Public play areas without supervision, such as playgrounds, parks or similar

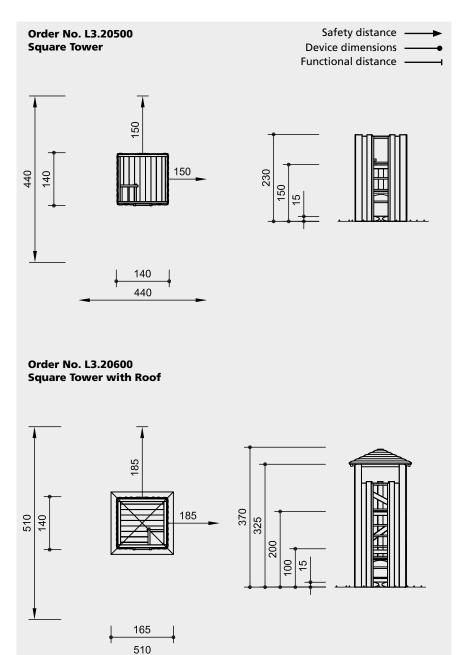

Square Tower

Square Tower with Roof

L3.20600 L3.20500

Safety check according to DIN EN 1176

Components

Order No. L3.20500

- Tower with:
 - 2 Floors, 1 ladder
 - Bench in the lower room
 - Passageway
- 4 Steel feet

Order No. L3.20600

- Tower with:
- 3 Floors, 1 ladder
- Bench in the lower room
- Passageway from 1st to 2nd floor
- Roof
- 4 Steel feet

Installation information

Surfacing requirements corresponding to a fall height of Order No. L3.20500 ≤ 1.50 m **Order No. L3.20600** ≤ 2.00 m (please refer to price list for more detailed information)

Scale 1:100

Foundations 4 items 50 x 50 x 55 cm Excavation depth 75 cm

Attention:

Exact measurements may vary; for all installation dimensions refer to current assembly instructions. Technical changes reserved.

Technical information

Equipment made of non-impregnated mountain larch

Core-free

Sawn-timbers core-free, thus decreasing occurrences of cracking and undesired changes in shape

Claddings

Claddings made of mountain larch (4 - 5 cm). Peeled white by hand, natural tree surface remains tangible and perceptible

Hardwood rungs

Climbing rungs made of hardwood (ash) Ø 4.2 cm, milled and mortised, secured against twisting, easy to grip and not cold for children to touch

Ground anchor

All parts used for anchoring to the ground are made of hot-dip galvanised steel or stainless steel

For more detailed explanation of the quality characteristics see price list.

Completely assembled construction
