

Proof of maintenance

A diagram of a submarine with a periscope. The periscope consists of a vertical tube with a horizontal eyepiece on the left and a horizontal objective lens on the right. The objective lens is labeled 'A' and the eyepiece is labeled 'B'. The submarine is shown with a conical hull and a conical conning tower. The water surface is indicated by a wavy line at the bottom.

7. In order to check for rot at the wooden parts or steel feet for corrosion, uncover the foundations once a year.

Maintenance carried out by:

Date

Special notes, e.g. for repairs
