

Proof of maintenance

A technical diagram of a tie joint assembly. It shows a cable with a braided section on the left, transitioning into a smooth cylindrical sleeve. This sleeve is connected to a larger, more complex component labeled '7' in a circle. Component 7 has a central opening and is surrounded by a structure labeled '8' in a circle. An arrow points from the text 'tie joint' to the connection point between the sleeve and component 7.

10. Uncover the foundation once a year in order to check for rot or the steel feet for corrosion.
